

To All Design and Construction Firms and Software Companies  
 Developing Innovative BIM and IPD Solutions:

Please join us in The AEC Interoperability Center – a new hands-on, interactive exhibit area at Ecobuild America.

Come share your ideas and examples of how Building Information Modeling (BIM) and Integrated Project Delivery (IPD) systems are revolutionizing collaboration, December 9 -10 in D.C.

Sponsored by the buildingSMART alliance of the National Institute of Sciences, the Center will visually demonstrate how these rapidly emerging technologies are redefining how projects are planned and scheduled, cost overruns are minimized, and how facilities are managed throughout the project lifecycle.

Whether you are new to BIM and IPD or your firm is a pioneer, the Center will encourage networking among peers and solutions developers alike.

Plug and play kiosks will be clustered in an island booth on the Ecobuild America exhibit floor, to create The AEC Interoperability Center. Just bring your laptop and software and you are ready to participate. Priced at just \$1,250 each, here is what is included:

- a counter-high kiosk with a high stool and carpeting
- standard participant sign with your company name
- electricity and internet connection
- a listing in the Show Program directory and on the Ecobuild website exhibiting firm list
- one free 3-day passport admission to the Ecobuild America conference (worth \$595)
- 100 free exhibit tickets to pass out to clients, prospects, colleagues and peers to share the experience

Space is limited so reserve your spot(s) now. Don't miss this unique opportunity to showcase your firm and projects one-on-one while gaining valuable feedback.

Best Regards,

George Borkovich
